20. Typology of military conflicts
21. Causes of military conflicts
22. Origin and evolution of conflicts – the conflict cycle
23. Instruments of conflict prevention
24. Instruments of conflict management

European studies/European union

1. EU as a political system - can the EU be characterised as a political system and why? What are other alternatives to the characterisation of the EU?
2. Neofunctionalism vs liberal intergovernmentalism – alternative explanations of developments in European integration; applied to economic governance reforms after 2008.
3. Why do states transfer competencies to the EU/supranational institutions? Alternative theoretical explanations.
4. Constructivism – changes in norms as the reason for a change in the EC/EU policies.
5. Supranational vs intergovernmental approach: the developments of institutional balance between the Member States and supranational institutions of the EC/EU, their context and manifestations in decision-making mechanisms.
6. EC/EU enlargements – historical contexts, impacts of enlargements on decision-making processes and policy changes.
7. Development of competencies of the European Parliament, its explanation in historical context and relation to the democratic deficit debate.
8. Constitutionalisation of the EU as a source of democratic legitimacy and institutional reform.
9. Agenda-setting in the EU – competencies and practice, specific examples in the last ten years.
10. The ordinary legislative procedure – developments, treaty provisions, decision-making within institutions and in inter-institutional relations.
11. Principles of the Internal Market and their historical development.
12. Persisting obstacles to the Internal Market and their causes.
13. Development of the European budget – reasons for and impacts of new resources and multiannual financial frameworks.
14. Common Agricultural Policy – reforms, their causes and impacts.
15. Common Agricultural Policy – differences in priorities of the Member States, current debates, differences in application, budgetary issues and preferences

16. Provisions of the Economic and Monetary Union and their application and enforcement as a possible cause for the economic crisis of 2008-2010.
17. Reforms of economic governance as a consequence of the economic crisis of 2008-2010.
18. Area of freedom, security and justice – a shift from intergovernmental to supranational decision-making logic.
19. Reactions to the migration crisis of 2015 – reforms of migration and asylum policies, obstacles to further reform.
20. British EC/EU membership – history, (non)participation in specific policies and reasons behind them, causes of Brexit.
21. Brexit negotiations, their outcomes and future developments in the context of the functioning of the internal market.
22. EU's climate policy, its development and future outlook.
23. EU's external relations – institutional and decision-making differences between individual policies.
24. European security – development and future of the Common Security and Defense Policy.

International economic relations

1. Discuss the relationship between power and wealth of nations in international economic relations. Provide examples of mechanisms through which power is projected into economic wealth, and vice versa.
2. Outline and discuss the key tenets of mainstream economic thinking about international economic relations (rational utility maximization, *homo oeconomicus*, market equilibrium).
3. Discuss the core concepts of economic theory (supply and demand curve, indifference curves, market equilibrium). In economic theory, is free exchange among market participants an efficient allocation mechanism?
4. Outline the core cause for free exchange of goods between states in economic theory – why is free international trade, in theory, beneficial?
5. Discuss how institutions of market economy interact with, and rely on, the broader framework of national political and social institutions (John Ruggie and embedded liberalism).
6. Outline the core tenets of the three main theoretical approaches to the relationship between state and economy in international economic relations (mercantilism, liberalism, Marxism).
7. Present the core tenets of the Ricardian model of comparative advantage.
8. What are the key reasons which states typically use to justify protectionist measures in their trade relations towards other countries? Discuss both economic reasons and broader non-trade concerns.
9. Present the Heckscher-Ohlin model and its discussion of the domestic distributive consequences of trade liberalization.
10. Outline the notions of economic interdependence and economic globalization. How do they differ? Discuss the notion of the 'flat world' (Thomas Friedman).
11. Discuss the core concepts and questions in international finance: the key actors, global financial flows, the problem of the balance of payments, and issues connected with states' currencies exchange rates.
12. Discuss the key issues in the history and present of global financial and monetary policies: the Bretton Woods institutions and the gold standard; globalization of finance and the liberalization of financial flows.
13. Discuss the positions and specific characteristics and interests of the so-called emerging powers, e.g. the BRICS countries, in the global economy.
14. Outline the notion of 'state capitalism' and its relationship to the so-called emerging powers. What is the position of rising powers in the current global economy?.

15. Discuss the key features of the ‘information age’ in relation to international economic relations and politics. Relate the debate to the problems of globalization and technological change.
16. What economic policies, or tools, do states have at their disposal in tackling economic crises, such as that brought about by the COVID-19 pandemic? Present the key elements of the fiscal and monetary policy toolbox.
17. Discuss the key concepts and arguments with regard to the current globalization backlash. What are the key economic causes of the backlash against globalization?
18. In political economic discussions, what are the key reasons for which globalization of the last decades contributes to growing inequality inside states? What models can be used to identify likely “winners” and “losers” of globalization?
19. What do we mean by a divergence of economic and political geography in the globalized world? Present the core argument of Danny Rodrick’s ‘inescapable trilemma of global political economy’.
20. List and discuss the key ways to assess (and measure) countries’ performance in the realm of international economic life and economic development. What are the different characteristics and specific indicators typically used to compare states’ economic performance in the global realm?
21. Present the different views on the notion of poverty and its different measures. What are the various approaches taken historically by the international community to address global poverty: SAPs, PRSPs, MDGs, SDGs.
22. Discuss the key theoretical approaches to the problem of development, from the 1960s until the 2000s. What have been the different perspectives on the role of the state in achieving development outcomes?

International institutions/organizations

- 1) Neoliberal institutionalism and international institutions
- 2) Realism, constructivism, and international institutions
- 3) Evolution of international institutions until the mid-20th century
- 4) Evolution of international institutions from the mid-20th century until nowadays
- 5) Organizational structure of international institutions
- 6) Functions of international institutions
- 7) Global arms control treaties and regimes
- 8) Global regime of nuclear non-proliferation (Nuclear Non-proliferation Treaty)
- 9) UN Security Council
- 10) UN peace operations
- 11) UN sanctions
- 12) Military operations authorized by the UNSC
- 13) WTO – goals, norms, institutional structure
- 14) WTO – global trade negotiations (areas, evolution, current situation)
- 15) IMF – goals, policy principles, institutional structure
- 16) IMF – loan provision
- 17) UN and development policy
- 18) World Bank
- 19) UN and environmental protection
- 20) Global climate regime
- 21) UN and human rights protection – basic documents and outcomes

22) UN and human rights protection – institutions, their competences, and their activities and outcomes

International law

1. Characteristics of International Law, Comparison with Private International Law and Domestic Law, Enforceability
2. Relationship between International Law and Domestic Legal Systems, e.g. the Czech Constitutional Order
3. Peremptory Norms of International Law – Meaning, List, Consequences
4. Subjects of International Law – Typology, Differences
5. International Intergovernmental Organization as a Subject of International Law – Legal Personality, Establishing Treaty, Rights
6. State as a Subject of International Law – Elements, Current Issues
7. Individual as a Subject of International Law
8. Sources of International Law – List, Characteristics
9. International Treaties – Sources of Regulation, Creation, Invalidation, Termination
10. International Custom as a Source of International Law
11. Territory of a State – Acquisition, Loss, Sovereignty
12. Law of the Sea – Sources of Regulation, Maritime Zones
13. State Responsibility – Basic Characteristics of State Responsibility, Modes of Attribution
14. State Responsibility – Forms of Reparation and Circumstances Precluding Wrongfulness
15. Individual Criminal Responsibility and History of International Criminal Law
16. The International Criminal Court
17. International Peace and Security – System of Chapter VII of the UN Charter
18. Self-defence under the UN Charter and Customary International Law
19. Law of War (Ius in Bello), Humanitarian Law – Sources, System, Principles
20. Victims of War (Geneva Law) – List, Sources of Protection, Definition of an Armed Conflict
21. Universal System of Human Rights Protection
22. Council of Europe System of Human Rights Protection
23. Case-law and Jurisprudence of Human Rights Protecting Bodies – ECtHR, HRC etc.
24. Admissibility Requirements of Individual Complaints to the European Court of Human Rights
